1. Overview of Operating Results, etc.

(1) Overview of Operating Results for the Period under Review

The Japanese economy during the three months ended June 30, 2025 continued to recover gradually thanks to improvements in the employment and income environment. However, looking ahead, we need to pay careful attention to the impact of trade policies, etc. of the United States and other countries on foreign economic and price trends, as well as on financial and foreign exchange markets.

In the construction industry, construction investment is on an increasing trend in nominal terms in both public and private sectors. However, the factors continuing to require close attention include the effects of continued high construction material prices and rising labor costs attributable to shortages in manpower and specialized contractors.

Under such business climate, our corporate group's consolidated performance for the three months ended June 30, 2025 was as follows:

Construction business's orders received reached 45,384 million yen, a decrease by 60,452 million yen (down 57.1% year on year), owing to decreases in both domestic and overseas construction.

Net sales decreased by 1,233 million yen (down 1.5% year on year) to 82,907 million yen, due to a decrease in real estate business and other, despite an increase in domestic civil engineering projects. Operating profit decreased by 1,647 million yen (down 35.2 % year on year) to 3,029 million yen, owing to factors including a decrease in gross profit on real estate business and other, despite an increase in gross profit on completed construction contracts of domestic building projects. Ordinary profit decreased by 2,337 million yen (down 47.9% year on year) to 2,540 million yen. Profit attributable to owners of parent decreased by 1,582 million yen (down 49.0% year on year) to 1,649 million yen.

The results of the reportable segments are as follows (segment results include internal net sales or transfers between segments).

① Civil Engineering Business

This reporting segment is mainly composed of sales from domestic civil engineering projects. Net sales in this segment increased by 5.8% year on year to 25,688 million yen, thanks to the smooth progress overall of construction projects. However, the segment's profit decreased by 65.5% year on year to 476 million yen, affected by a decrease in gross profit on completed construction contracts due to a decrease in net sales of completed construction contracts of high-margin projects.

On the Company's non-consolidated basis, orders received from domestic civil engineering projects decreased by 21,804 million yen (down 61.2% year on year) to 13,845 million yen, partly owing to a reactionary decline following the large-scale public-sector construction projects secured during the previous year's same period.

② Building Business

This reporting segment is mainly composed of sales of domestic building projects. Net sales in this segment increased by 0.4% year on year to 47,216 million yen, thanks to the smooth progress overall of construction projects. Segment profit increased by 236.7% year on year to 2,095 million yen due to an improvement in the gross margin on completed construction contracts, which was helped by the percentage decrease of construction projects affected by rising prices.

On the Company's non-consolidated basis, orders received for domestic building projects decreased by 19,594 million yen (down 40.8% year on year) to 28,434 million yen due to a decrease in both private-sector and public-sector building projects.

③ International Business

This reporting segment is mainly composed of sales from overseas civil engineering and overseas building projects. Net sales in this segment decreased by 5.2% year on year to 6,160 million yen, with the segment loss of 153 million yen (compared to a segment loss of 2 million yen of the previous year's same period).

On the Company's non-consolidated basis, orders received for overseas projects decreased by 19,446 million yen (down 97.2% year on year) to 569 million yen, due to a reactionary decline following the large-scale civil engineering contract in Singapore secured during the previous year's same period.

(4) Asset Value-Added Business

This reporting segment is mainly composed of sales and leasing income from real estate properties owned. Net sales in this segment decreased by 39.4% year on year to 4,107 million yen, mostly resulting from a decrease in the segment's sales business, which led to a segment profit decrease by 73.1% year on year to 773 million yen mainly due to a decrease in net sales of sales business.

(5) Regional Environmental Solution Business

This reporting segment is mainly composed of sales from the renewable energy business and the community development projects. Net sales in this segment increased by 826.1% year on year to 150 million yen. However, the segment loss was 183 million yen (compared to a segment loss of 176 million yen of the previous year's same period).

(2) Overview of Financial Position for the Period under Review

Total assets at the end of the first quarter of the fiscal year under review increased by 11,227 million yen (up 1.9%) to 603,274 million yen, compared to the end of the previous consolidated fiscal year, owing to an increase in cash and deposits, despite decreases in notes receivable, accounts receivable from completed construction contracts and other, and investment securities.

Total liabilities increased by 15,961 million yen (up 3.9%) compared to the end of the previous consolidated fiscal year to 426,817 million yen, owing to increases in deposits received, short-term borrowings, and commercial papers, despite a decrease in notes payable, accounts payable for construction contracts and other.

Net assets decreased by 4,733 million yen (down 2.6%) compared to the end of the previous consolidated fiscal year to 176,456 million yen, primarily due to a decrease in retained earnings owing to dividends paid. As a result, the owner's equity ratio was 27.8%, a decrease of 1.3 percentage points from the end of the previous consolidated fiscal year.

(3) Information Regarding Consolidated Earnings Forecasts and Other Forward-Looking Information

In the construction business, we expect to achieve our sales and profit targets, based on past performance of growth in sales and gross profit and the smooth progress of the revenue improvement plan in the building business. While we need to continue to pay close attention to trends in tariff policy shifts in the United States, we currently consider the effect on this period's performance to be insignificant.

Additionally in the real estate business, the property sales plan is proceeding as scheduled.

Based on the above, the performance forecast announced in the "Consolidated Financial Results for the Year Ended March 31, 2025 [Japanese GAAP]", published on May 12, 2025 remain unchanged.
